# Trustee's Report For the year ended 31 December 2024

#### **Statement of Corporate Governance**

TotalEnergies EP Nigeria CPFA Limited is the administrator and sole trustee of the Fund. TotalEnergies EP Nigeria CPFA Limited is committed to being an effective and accountable company, and its Board of Directors recognise the role of a proper governance framework and effective guidelines and procedures, policies and processes in the efficient administration of the company towards the achievement of its objectives. A Statement of Corporate Governance Guidelines has been established in line with the regulatory framework established by the National Pension Commission (PenCom) and demonstrates TotalEnergies EP Nigeria CPFA Limited's commitment to applying best business practices and ethical standards in all aspects of its operations.

#### **Nature and Purpose**

The TotalEnergies EP Nigeria Staff Non-contributory Pension Fund was established by Total E&P Nigeria Limited - TEPNG (Now TotalEnergies EP Nigeria Limited) in 1993 as a separate fund to accumulate resources for the purpose of meeting obligations under her End of Service Benefit Scheme. The Scheme, a defined benefit plan, provides pension benefits to all qualifying employees of TEPNG ("the Sponsor" or "the Company") retiring in line with the Scheme rules and regulations. Nigerian employees of TEPNG qualify for membership of the Scheme upon confirmation of employment. The TEPNG Pension scheme was closed to new entrants on 31st December 2013. All employees recruited after this date fall under the Contributory Pension Scheme (CPS), and their contribution paid to a Pension Fund Administrator (PFA) of their choice.

Pension benefits payable to qualifying members are calculated based on an accrual rate of 2% of the employee's final pensionable salary multiplied by the completed years of accredited service.

Pensionable salary is defined as the employee's terminal consolidated salary plus leave allowance plus end of year bonus.

A member who has completed a minimum of 15 years' accredited service shall be entitled to normal pension benefits upon attaining the normal retirement age of 35 years of service or 60 years of age; whichever comes earlier. Furthermore, members with 15 or more years of accredited service may qualify for voluntary early retirement and pension benefits would become payable upon attainment of 45 years of age provided that the pension would be discounted at 3% for each year that the member elects to retire before attaining the age of 50 years. However, members qualified for pension and retiring on health grounds as certified by the Company's medical board are entitled to pension benefits payable from the date of their retirement provided such date meets the minimum age for early pension or 45 years. The 3% yearly discounting rule shall not apply in this case.

The normal retirement age under the Scheme is 60 years effective 1 January 2015. A member who leaves the Company's service to take up employment in another establishment or while still in the Company's service opts out of the Scheme to join a different Scheme, may elect that the pension benefit due to him/her, based on the Scheme's Transfer Value rules, be transferred to a designated Retirement Savings Account (RSA) opened with a licensed Pension Fund Administrator (PFA) of his/her choice.

#### **Statement of Corporate Governance- Continued**

All accredited Company services from 1 January 2005 are pensionable. The pension rights of a member who leaves the Company's service with less than 15 years' accredited service shall accrue for only Company service rendered from 1 January 2005 to the date of leaving.

Under the Scheme's rules, a member may elect to have a maximum of 50% of his/her annual pension multiplied by a Commutation Factor commuted to lumpsum payment at the date of exit. The Commutation Factor is an age related actuarially determined multiplier that takes account of the Scheme's accrual rates/benefits replacement ratio, mortality rate, returns/time value of money indices, etc. Any commuted pension amount shall be forfeited and member's future pension entitlements shall be based on the balance only.

#### **Contributions**

The Pension Scheme is non-contributory and is funded by the Sponsor, TotalEnergies EP Nigeria Limited together with its venture partners in the ratio of the respective interests in the partnerships. The Scheme's Actuary determines funding obligations based on the Scheme rules and regulations and relevant economic and demographic assumptions and makes recommendations on the funding.

The Pension Scheme provides for monthly benefits payable to qualifying members from their dates of retirement. The benefit is payable over the pensioner's lifetime and is guaranteed for the first five years of retirement. In the event that a member dies within the five years after retirement, the balance due is payable to the member's registered beneficiaries.

#### Vested benefits

Benefits awarded under the rules of the Trust Deed shall be regarded as members' inalienable rights and shall, under no circumstances, be withheld or reduced except on grounds of implementation of a court order in specified circumstances.

#### Status of the Fund

The Scheme is approved by the National Pension Commission (PenCom) as a Closed Pension Scheme under the Pension Reform Act 2014 as amended and is managed by TotalEnergies EP Nigeria CPFA Limited - a licensed Closed Pension Fund Administrator (CPFA). The License Agreement consummating this arrangement was signed between PenCom and the CPFA effective July 2, 2007.

#### Winding up of the pension fund

Subject to the approval of the National Pension Commission (PenCom), TEPNG may declare the Pension Fund closed. On the closure date, TEPNG shall be liable to contribute to the Pension Fund an amount, as certified by the actuary that would be required to enable the Pension Fund to provide in full the pension benefits which had fallen due for payment on or before the closure date. Any surplus arising after all liabilities have been liquidated shall belong to TEPNG.

2024

#### **Statement of Corporate Governance- Continued**

#### Member's right to opt out of the Scheme

In line with provisions of the Pension Reform Act 2014 as amended, every member of the Scheme shall have an inalienable right to opt out of the Scheme for a Defined Contribution Plan. Where a member decides to opt out of the Scheme without leaving the services of the Company, the Fund shall determine the Transfer Value of the accrued pension benefits and transfer the amount to a Retirement Savings Account (RSA) nominated by the member in writing under the option.

This right, available to members, shall be one-way only, i.e. members who opt out of the Defined Benefit Scheme shall not have an opportunity to come back under the Scheme in future.

#### **Trustee**

TotalEnergies EP Nigeria CPFA Limited is the sole trustee to the Fund. The directors who served during the year and as at the time of this report, were as follows:

Name	Position	Nationality	Date Appointed/(Resigned)
Frederick Asasa	Chairman		17th August 2024
Oluwaseun Orimolade	Director		
Oluwole Oladimeji	Director		
Olutola Mobolurin	Independent Director		
Evi Ifekwe	(Chairman)		(17th August 2024)
Victor Ibeawuchi	Director		(28th October 2024)
Anthony Abolarin	Director		
Benjamin Okorie-Agidi	Managing Director		
Celine Brasquet	Director	(French)	
Kenechi Esomeju	Director		

#### **Membership**

Total membership of the Scheme as at 31 December 2024 stood at 1,520 (2023: 1,532)

	2024	2023
In Pension (Retirees)	544	538
In deferred Pension	7	7
In service (15 years and above)	730	696
In service (Less than 15 years)	239	291
	1,520	1,532

#### Financial results

The results for the year are as follows: In thousands of Nigerian Naira Net Assets available for benefits as at beginning Net increase in Fund for the year

2024	2023
474,381,966	362,633,567
161,916,348	111,748,399
636,298,314	474,381,966

#### **Funded status**

As at the reporting date, the Net Asset Value (NAV) of the Fund was №636.30 billion (2023: №474.38 billion). Based on the actuarial valuation of the Fund as at 31 December 2024, the Fund had an actuarial surplus of ₹103.93 billion (2023: Surplus of N104.64 billion). The present value of pension benefit obligations under the Scheme stood at N469.21 billion (2023: N322.19 billion) (under a liquidation or vested benefit basis) and ₹526.48 bllion (2023: ₹369.75 billion) (on a going-concern or projected benefit basis).

It is the objective of the Plan's Sponsor, together with the Trustees, to adequately fund the Scheme in order to achieve full funded status in compliance with the relevant provisions of the Pension Reform Act, 2014, as amended and applicable guidelines and regulations issued pursuant to it by PenCom.

#### Investment strategy

The Pension Fund's investment strategy is to ensure compliance with applicable investment rules as provided for in the Pension Reform Act, 2014 as amended and investment guidelines and regulations issued by PenCom pursuant thereto. In broad terms, the objective is to achieve a viable and strong asset base through appropriate asset allocation modules to effectively immunize the Scheme's pension obligations and generate long term surplus. This we seek to accomplish through diligent evaluation of investment opportunities and selection of an optimal portfolio mix of fixed income, real estate, and quoted equities investment grade instruments that will generate rates of return greater than the applicable benchmark rates as well as rates of inflation over the longterm. The drive will always be to strike a balance among the triumvirates of liquidity, safety of funds and returns, consistent with the payment obligation profiles, while ensuring compliance with all subsisting statutory guidelines.

#### Events after reporting date

Refer to Note 28 to the financial statements for disclosure relating to events subsequent to the reporting date.

#### Auditors

Messrs Ernst & Young has expressed their willingness to continue in office as the Fund's auditor.

By Order of the Trustees:

Secretary to the Board Avodele Afolabi

FRC/2020/002/00000020582

Lagos, Nigeria 25 April 2025

#### Statement of trustee's responsibilities in relation to the preparation of financial statements

The Trustee accept responsibility for the preparation of the financial statements that give a true and fair view in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and in the manner required by the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Pension Reform Act, 2014 as amended and relevant National Pension Commisssion guidelines and circulars.

The Trustee further accept responsibility for maintaining adequate accounting records and for such internal control as the Trustee determines is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

The Trustee has made an assessment of the Fund's ability to continue as a going concern and has no reason to believe the Fund will not remain a going concern in the years ahead.

# Independent Auditor's Report

To the Members of TotalEnergies EP Nigeria Staff Non-Contributory Pension Fund

# Report on the Audit of the Financial Statements

#### Opinion

We have audited the financial statements of TotalEnergies EP Nigeria Staff Non-Contributory Pension Fund ('the Fund'), which comprise the statement of net assets available for benefits as at 31 December 2024, the statement of changes in net assets available for benefits and statement of cash flows for the year then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of TotalEnergies EP Nigeria Staff Non-Contributory Pension Fund as at 31 December 2024, and its financial performance and cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board, the provisions of the Companies and Allied Matters Act, 2020, the Pension Reform Act, 2014, the National Pension Commission (PENCOM) guidelines and in compliance with the Financial Reporting Council of Nigeria (Amendment) Act, 2023.

# Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Nigeria, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

# Key Audit Matters - Continued Key Audit Matter

# Expected Credit Loss (ECL) assessment of financial assets

The Fund has significant financial assets which include cash and cash equivalents and financial assets at redemptive value and receivables; these represent about 90% of the total assets.

At each reporting date, these financial assets are tested for impairment through ECL model. The estimation of Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD) requires judgement and for the Fund, the impact may be significant due to the Fund's current financial assets composition.

The ECL involves the application of judgement and estimation in determining inputs for ECL calculation, such as:

- Determining criteria for significant increase in credit risk (SICR) for staging purposes.
- Assessing the relationship between the quantitative factors such as default and qualitative factors such as macro-economic variables.
- Incorporating forward looking information in the model building process.
- Factors incorporated in determining the Probability of Default (PD), Loss Given Default (LGD), the Recovery Rate and the Exposure at Default (EAD).
- Factors considered in multiple scenarios.

# How the matter was addressed in the audit

# Our procedures included following:

- We reviewed the ECL model prepared by management for computation of ECL on financial assets in line with the requirements of IFRS 9: Financial instruments.
- We gained an understanding of how the PDs and LGDs were determined by management.
- We tested the historical accuracy of the model by assessing the historical projections versus actual losses.
- We performed detailed procedures on the completeness and accuracy of the information used.
- For Receivables and other assets, we selected material balances and reviewed the customer's payment pattern. We reviewed the various factors considered in classifying other financial instruments within stages 1 and 2 in the measurement of ECL.
- For Receivables and other assets, we reviewed all assumptions considered in the estimation of recovery cash flows, the discount factor, and the timing of realization.

# Other Information

The Trustees are responsible for the other information. The other information comprises the information included in the document titled "TotalEnergies EP Nigeria Staff Non-Contributory Pension Fund Audited Financial Statements for the year ended 31 December 2024 Together with Trustee's and Auditor's Reports", which includes the Trustees' Reports, Statement of trustee's responsibilities in relation to the preparation of financial statements and Other National Disclosures. The other information does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

# Responsibilities of the Trustees for the Financial Statements

The Trustees are responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board, the provisions of the Companies and Allied Matters Act, 2020, the Pension Reform Act, 2014, the National Pension Commission (PENCOM) guidelines and in compliance with the Financial Reporting Council of Nigeria (Amendment) Act, 2023, and for such internal control as the Trustees determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Trustees are responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Trustees either intend to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

# Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due
  to fraud or error, design and perform audit procedures responsive to those risks, and obtain
  audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of
  not detecting a material misstatement resulting from fraud is higher than for one resulting from
  error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the
  override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Trustees.

# Auditor's Responsibilities for the Audit of the Financial Statements - Continued

- Conclude on the appropriateness of the Trustees' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Trustees regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

From the matters communicated with the Trustees, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Kanayo Echena FRC/2012/PRO/ICAN/004/00000000150

#### 1 Reporting Entity

TotalEnergies EP Nigeria Staff Non-Contributory Pension Fund (the "Fund") is a Scheme domiciled in Nigeria. The Scheme is operated and managed based on Section 50 of the transitional provisions of the Pension Reform Act 2014 as amended. The address of the Fund's registered office is 35, Kofo Abayomi Street, Victoria Island Lagos.

The TotalEnergies EP Nigeria Staff Non-Contributory Pension Fund is a non-contributory pension fund, to which the funding company, TotalEnergies EP Nigeria Limited (TEPNG) contributes at a rate determined from time to time by the Fund's Actuary.

TotalEnergies EP Nigeria Closed Pension Fund Administrator Ltd is the Investment Manager, as well as the administrator of the Fund (the "Investment Manager")" ("Administrator").

Zenith Pensions Custodian is the Custodian of the Fund.

#### (a) Funding arrangements

Funding comes from TEPNG at a rate determined from time to time by the Fund's actuary.

These funding arrangements are consistent with those of the previous period.

The Sponsor has contributed to the Fund during the current year approximately 12.5% (2023: 12.5%) of the pensionable earnings of those employees who were members of the Fund.

#### (b) Retirement benefits

The retirement benefits are determined based on an accrual rate of 2% of the employees final pensionable salary multiplied by the completed years of accredited service.

#### (c) Termination terms

The Trust Deed sets out the basis on which the scheme can be terminated.

#### (d) Membership

The Trust Deed was amended in 2014 to close the scheme to new members.

#### 2 Basis of preparation

#### (a) Statement of Compliance

The financial statements of the Fund as at 31 December 2024 have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board and in a manner required by the Financial Reporting Council of Nigeria (Amendment) Act, 2023, the Pension Reform Act 2014, and the National Pension Commission (PENCOM) guidelines. The financial statements have been presented based on the provisions of IAS 26: Accounting and Reporting by Retirement Benefit Plans.

The financial statements were authorised for issue by the trustee on  $25^{\text{th}}$  April, 2025.

#### (b) Basis of measurement

These financial statements have been prepared on historical cost basis, except as otherwise stated.

#### (c) Functional and presentation currency

This financial statements are presented in Naira, which is the functional and presentation currency of the Fund. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

#### (d) Use of estimates and judgments

The preparation of financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses, as well as contingent assets and liabilities. Actual results may differ from these estimates.

Management bases its judgments and estimates on historical experience and various other factors that are believed to be appropriate and reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ended 31st December 2024 are included in the following note(s):

Note 31 - Actuarial Present Value of Accumulated Pension Fund Benefits and Net assets - key actuarial assumptions.

Note 10 - Unobservable inputs in determining fair value of investment properties - key valuation assumptions.

Note 3(a) and 7'(c).. - Classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial assets are SPPI on the principal amount outstanding.

#### (a) Financial assets and liabilities

#### (i) Recognition and initial measurement

The Fund initially recognizes financial assets and financial liabilities at fair value through changes in net assets on the trade date, which is the date that the Fund becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognized on the date on which they are originated.

A Financial asset or financial liability is measured initially at fair value plus/minus, for an item not at fair value through net assets, transaction costs are directly attributable to its acquisition or issue.

#### (ii ) Classification and subsequent measurement -

On initial recognition, the Fund classifies financial assets as measured at amortised cost or fair value through changes in net assets. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through changes in net asset:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI).

All other financial assets of the Fund are measured at fair value through changes in net assets.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Fund's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the managers of the business are compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected: and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

The Fund has determined that it has two business models.

- Held-to-collect business model: This includes cash and cash equivalents, receivables and financial assets held at redemption value (these are securities with fixed redemption value that have been acquired to match the obligations of the Fund, or specific part thereof). These financial assets are held to collect contractual cash flow and are accounted for at amortised cost.
- Other business model: This includes equity investments, investments in unlisted open-ended investment funds, unlisted private equities and some other investments in debt securities. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

#### Assessment whether contractual cash flows are SPPI

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin. In assessing whether the contractual cash flows are SPPI, the Fund considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Fund considers:

- contingent events that would change the amount or timing of cash flows;
- leverage features;
- prepayment and extension features;
- terms that limit the Fund's claim to cash flows from specified assets e.g. non-recourse features;
- features that modify consideration of the time value of money e.g. periodical reset of interest rates.

For a reconciliation of line items in the statement of net assets to the categories of financial instruments, as defined by IFRS 9, see Note 7(c).

#### Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the Fund were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

#### Modifications of financial assets and financial liabilities- Financial assets

If the terms of a financial asset are modified, the Fund evaluates whether the cash flows of the modified asset are substantially different. If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is de-recognized and a new financial asset is recognized at fair value. Any costs or fees incurred as part of the modification are recognised as part of the gain or loss on derecognition.

If the cash flows of the modified asset are not substantially different, then the modification does not result in derecognition of the financial asset. In this case, the Fund recalculates the gross carrying amount of the financial asset using the original effective interest rate (EIR) and recognizes any difference arising between this recalculated amount and the existing gross carrying amount as a modification gain or loss in profit or loss. Any costs or fees incurred as part of the modification adjust the carrying amount of the modified financial asset, and are amortised over the remaining term of the modified financial asset.

#### - Financial liabilities

The Fund derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognized at fair value. The difference between the financial liability extinguished and the new financial liability with modified terms is recognized in profit or loss.

When the cash flows of the modified financial liability are not substantially different, then the modification does not result in derecognition of the financial liability and any difference is recognized in profit or loss (similar to the principle for accounting for modification of financial asset that do not result in derecognition).

#### Subsequent measurement of financial assets

Subsequent to initial measurement, financial assets are measured either at fair value or amortised cost, depending on their classification.

#### Financial assets at fair value through changes in net assets

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income and expense and foreign exchange gains and losses, are recognised in the statement of changes in net assets.

Debt securities, equity investments, investments in unlisted open-ended investment funds, unlisted private equities and derivative financial instruments are included in this category.

#### Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. Interest income is recognised in interest income calculated using the effective interest method, foreign exchange gains and losses are recognised in 'interest method, foreign exchange gains and losses are recognised in 'interest method, foreign exchange loss' and impairment is recognised in 'impairment losses on financial instruments' in the statement of changes in net assets. Any gain or loss on derecognition is also recognised in profit or loss.

Financial assets held at redemption value, cash and cash equivalents, receivables are included in this category.

Financial liabilities - Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or fair value through changes in net assets. A financial liability is classified as at fair value through changes in net assets if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at fair value through changes in net assets are measured at fair value and net gains and losses, including any interest expense, are recognised in statement of changes in net assets.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in statement of changes in net assets.

The Fund's financial liabilities comprise of benefits payable, and this refers to the entitlements of members who ceased employment with the employer (sponsor) prior to year end, but have not been paid by that date. Other financial liabilities are payable on demand or short time-frames of less than 90 days.

#### (iii) Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Fund has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Fund measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The Fund measures instruments quoted in an active market at a mid price, because this price provides a reasonable approximation of the exit price.

If there is no quoted price in an active market, then the Fund uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The Fund recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

#### (iv) Amortised cost measurement

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

#### (v) Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of net assets when, and only when, the Fund has a currently enforceable legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously. The financial assets and liabilities are presented on a gross basis.

Income and expenses are presented on a net basis only when permitted by accounting standards, or for gains and losses arising from a group of similar transactions.

#### (vi) Impairment

The Fund recognizes loss allowances for expected credit losses (ECL) on the following financial instruments that are not measured at fair value through statement of changes in net assets: debt instruments, other assets and receivables. No impairment loss is recognized on equity investments and other financial assets measured at fair value through statement of changes in net assets.

The Fund measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments (other than other receivables) on which credit risk has not increased significantly since their initial recognition.

Loss allowances for other assets and receivables are always measured at an amount equal to lifetime ECL. Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Fund is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Fund considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward-looking information.

The Fund considers a debt security to have low credit risk when their credit risk rating of the counterparty is equivalent to the globally understood definition of 'investment grade' or it is a sovereign debt issued in the local currency e.g. Treasury bills and Bonds issued by the Nigerian Government.

#### Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Fund in accordance with the contract and the cash flows that the Fund expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

#### Credit-impaired financial assets

At each reporting date, the Fund assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for a security because of financial difficulties.

A debt instrument that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a debt instrument that is overdue for 90 days or more is considered impaired. In making an assessment of whether an investment in subnational/supranational/corporate debt instrument is credit-impaired, the Fund considers the following factors:

- The market's assessment of creditworthiness as reflected in the bond yields.
- The rating agencies' assessments of creditworthiness.
- The current financial situation of the sub-national/supranational/corporate issuer.
- The mechanisms in place to provide the necessary support (from the central government), as well as the intention, reflected in public statements of governments/corporate issuer and availability to use those mechanisms.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

#### Write-off

The gross carrying amount of a financial asset is written off when the Fund has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

#### (vii) Derecognition

The Fund derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Fund neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognized) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss. Any interest in such transferred financial assets that is created or retained by the Fund is recognised as a separate asset or liability. The Fund enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them. If all or substantially all of the risks and rewards are retained, then the transferred assets are not derecognized. Transfers of assets with retention of all or substantially all of the risks and rewards include sale and repurchase transactions.

The Fund derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expired. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

#### (b) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and overdraft if the Fund has the legal right to offset and call deposits with original maturities of three months or less, which are subject to insignificant risk of changes in their fair value, and are used by the Fund in the management of its short-term commitments.

#### (c) Cash flow statement

The cash flow statement is prepared using the indirect method. Changes in statement of net assets items that have not resulted in cash flows, have been eliminated for the purpose of preparing the statement. Interest paid is included in financing activities while interest received and income received is included in investing activities.

#### (d) Investment property

Investment property is initially measured at cost and subsequently at fair value with any change therein recognised in statement of changes in net assets.

Any gain or loss on disposal of investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in statement of changes in net assets.

Investment property under construction

Investment property under construction is measured at cost until construction is completed. Subsequently, the Fund measures this investment property at fair value.

#### (e) Investment income

Interest income

Interest income is recognised in the statement of changes in net assets as it accrues, using the original effective interest rate of the instrument calculated at acquisition or origination date. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset to the gross carrying amount of the financial asset or the amortised cost of the financial liability.

In calculating interest income, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortized cost of the financial asset. If the asset is no longer credit impaired, then the calculation of interest income reverts to the gross basis.

#### Dividend income

Dividend income is recognised when the right to receive income is established, which in the case of quoted equity securities is the ex-dividend date.

#### Distribution income

Distributions from managed investment funds are recognised as at the date the unit value is quoted ex-distribution and if not received at reporting date, are reflected in the statement of net assets as a receivable at net market value.

#### Rental income

Rental income from investment property is recognised in statement of changes in net assets on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

Net gain from investments at fair value

Net gain from investments at fair value includes all realised and unrealised fair value changes and is determined as the difference between the fair value at year end or consideration received (if sold during the period) and the fair value as at the prior year end or cost (if the investment was acquired during the period). It does not include interest, dividend, rental or distribution income.

#### (f) Contributions

Contributions are accounted for on an accrual basis and are recognised when the control and the benefits from the revenue have been transferred to the Fund

#### (g) Expenses

All expenses are accounted for on an accrual basis.

#### (h) Foreign currency

Foreign currency transactions and balances

Transactions in foreign currencies are translated to the respective functional currency of the Fund at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date.

The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortised cost in foreign currency translated at the exchange rate at the end of the reporting period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items in a foreign currency that are measured in terms of historical cost are translated using the exchange rate at the date of the transaction. Foreign currency differences arising on retranslation are recognised in the statement of changes in net assets.

#### (i) Impairment

Non financial assets

The carrying amounts of the Fund's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. For intangible assets that are not yet available for use, the recoverable amount is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### (j) Benefit payable

Pension benefits payable to qualifying members are calculated based on an accrual rate of 2% of the employee's final pensionable salary multiplied by the completed years of accredited service.

#### (k) Guaranteed benefit

Guaranteed benefits are payable to Fund members who have completed a minimum of 15 years accredited service and may qualify for voluntary early retirement upon attainment of 45 years of age.

#### (m) Taxation

In accordance with Section 10(2) of the Pension Reform Act (PRA) 2014, all interests, dividends, profits, investment and other income accruable to pension funds and assets under this Act shall not be taxable.

#### 4 Changes in Significant accounting policies

Standards and interpretations effective for the first time for 31 December 2024 year end are as follows:

Pronouncement	Summary of requirements and assessment of impact	Effective date
International Tax	The amendments are effective immediately upon issuance, but certain disclosure requirements	These amendments had no
International Tax Reform – Pillar Two Model Rules -	The amendments are effective immediately upon issuance, but certain disclosure requirements	These amendments had no impact on the financial statements of the Fund as the Fund does not have insurance
	information about its exposure to Pillar Two income taxes at the end of the reporting period.	
Classification of Liabilities as Current or Non current and Non-current Liabilities with Covenants - Amendments to IAS 1	The amendment does not have any material impact on the Fund.  Effective for annual periods beginning on or after 1 January 2024.  In January 2020 and October 2022, the Board issued amendments to IAS 1 Presentation to Financial Statements to specify the requirements for classifying liabilities as current or noncurrent. The amendments clarify:  • What is meant by a right to defer settlement  • That a right to defer settlement must exist at the end of the reporting period  • That classification is unaffected by the likelihood that an entity will exercise its deferral right  • That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification  • Disclosures  Right to defer settlement  The Board decided that if an entity's right to defer settlement of a liability is subject to the entity complying with the required covenants only at a date subsequent to the reporting period ("future covenants"), the entity has a right to defer settlement of the liability even if it does not comply with those covenants at the end of the reporting period. Furthermore, the Board specified that the requirements in paragraph 72B of IAS 1 apply only to liabilities arising from loan arrangements. The Fund is not expected to be impacted with this amendment.	•
Sale and Leaseback -	Effective for annual periods beginning on or after 1 January 2024. In September 2022, the Board issued Lease Liability in a Sale and Leaseback (Amendments to IFRS 16). The amendment to IFRS 16 Leases specifies the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction, to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. After the commencement date in a sale and leaseback transaction, the seller-lessee applies paragraphs 29 to 35 of IFRS 16 to the right-of-use asset arising from the leaseback and paragraphs 36 to 46 of IFRS 16 to the lease liability arising from the leaseback. In applying paragraphs 36 to 46, the seller lessee determines 'lease payments' or 'revised lease payments' is such a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use retained by the seller-lessee. Applying these requirements does not prevent the seller-lessee from recognising, in profit or loss, any gain or loss relating to the partial or full termination of a lease, as required by paragraph 46(a) of IFRS 16.  The amendment does not prescribe specific measurement requirements for lease liabilities arising from a leaseback. The initial measurement of the lease liability arising from a leaseback may result in a seller-lessee determining 'lease payments' that are different from the general definition of lease payments in Appendix A of IFRS 16. The seller-lessee will need to develop and apply an accounting policy in accordance with IAS 8 that results in information that is relevant and reliable.  The amendments are not expected to have a material impact on the Fund.	statements of the Fund.

These amendments had no

impact on the financial

#### **Notes to the Financial Statements**

and IFRS 7

Disclosures: Supplier Effective for annual periods beginning on or after 1 January 2024.

Finance Arrangements In May 2023, the Board issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 - Amendments to IAS 7 Financial Instruments: Disclosures. The amendments specify disclosure requirements to statements of the Fund. enhance the current requirements, which are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

> The amendments clarify the characteristics of supplier finance arrangements. In these arrangements, one or more finance providers pay amounts an entity owes to its suppliers. The entity agrees to settle those amounts with the finance providers according to the terms and conditions of the arrangements, either at the same date or at a later date than that on which the finance providers pay the entity's suppliers.

> The amendments require an entity to provide information about the impact of supplier finance arrangements on liabilities and cash flows, including terms and conditions of those arrangements, quantitative information on liabilities related to those arrangements as at the beginning and end of the reporting period and the type and effect of non-cash changes in the carrying amounts of those arrangements. The information on those arrangements is required to be aggregated unless the individual arrangements have dissimilar or unique terms and conditions. In the context of quantitative liquidity risk disclosures required by IFRS 7, supplier finance arrangements are included as an example of other factors that might be relevant to

The Fund is not expected to be impacted with this amendment.

# 5 Standards and interpretations issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Fund's financial statements are disclosed below. The Fund intends to adopt these new and amended standards and interpretations, if applicable, when they become effective. The Fund has consistently applied the accounting policies as set out in Note 3 to all periods presented in these financial statements.

Pronouncement	Summary of requirements	Assessment of Impact
	In August 2023, the International Accounting Standards Board (IASB) amended IAS 21 to clarify:  • when a currency is exchangeable into another currency; and • how a company estimates a spot rate when a currency lacks exchangeability.  A currency is exchangeable into another currency when a company is able to exchange that currency for the other currency at the measurement date and for a specified purpose. When a currency is not exchangeable, a company needs to estimate a spot rate. A company's objective when estimating a spot rate is only that it reflects the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions.  Under the amendments, companies will need to provide new disclosures to help users assess the impact of using an estimated exchange rate on the financial statements. These disclosures might include:  • the nature and financial impacts of the currency not being exchangeable; • the spot exchange rate used; • the estimation process; and risks to the company because the currency is not exchangeable.	The Fund is not expected to be impacted with this amendment.
Measurement of Financial Instruments -	In May 2024, the Board issued Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7), which:  • Clarifies that a financial liability is derecognised on the 'settlement date', i.e., when the related obligation is discharged, cancelled, expires or the liability otherwise qualifies for derecognition. It also introduces an accounting policy option to derecognise financial liabilities that are settled through an electronic payment system before settlement date if certain conditions are met  • Clarified how to assess the contractual cash flow characteristics of financial assets that include environmental, social and governance (ESG)-linked features and other similar contingent features  • Clarifies the treatment of non-recourse assets and contractually linked instruments  • Requires additional disclosures in IFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESG-linked), and equity instruments classified at fair value through other comprehensive income. This is applied to annual reporting periods beginning on or after 1 January 2026 and can be applied earlier.	amendments to have a significant impact on the its financial statements. The amendments apply for annual reporting periods beginning on or after 1 January 2025. Earlier application is permitted.
Adoption of	Paragraphs B5 and B6 of IFRS 1 have been amended to include cross references to the qualifying criteria for hedge accounting in paragraph 6.4.1(a), (b) and (c) of IFRS 9. These amendments are intended to address potential confusion arising from an inconsistency between the wording in IFRS 1 and the requirements for hedge accounting in IFRS 9.  An entity applies the amendments for annual reporting periods beginning on or after 1 January 2026. Earlier application is permitted. The amendments had no impact on the Company's financial statements.	amendments for annual reporting periods beginning on or after 1 January 2026. Earlier application is permitted. The amendments

#### 6 Financial risk management

#### (a) Introduction and overview

The Fund has exposure to the following risks from financial instruments:

- \* credit risk
- \* liquidity risk
- \* market risk

This note presents information about the Fund's exposure to each of the above risks, the Fund's objectives, policies and processes for measuring and managing risk, and the Fund's management of capital.

#### (b) Risk management framework

The Fund maintains positions in a variety of non-derivative financial instruments in accordance with its investment management strategy. The Fund's investment portfolio comprises quoted equity investments, investments in treasury bills, FGN bonds, State government bonds, corporate bonds, infrastructure fund and mutual funds.

Asset purchases and sales are determined by the Fund's Investment Manager, compliance with the target asset allocations and the composition of the portfolio is monitored by the Board of directors of the Trustee. In instances where the portfolio has diverged from target asset allocations, the Fund's Investment Manager is obliged to take actions to rebalance the portfolio in line with the established targets, within prescribed time limits.

#### (i) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund, resulting in a financial loss to the Fund. It arises principally from investment securities, cash and cash equivalents, receivables and other assets

#### Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was as follows.

		Carrying ar	nount
In thousands of naira	Note	31 December 2024	31 December 2023
Financial assets held at amortized cost	<i>9(b)</i>	489,894,235	393,857,202
Financial assets at fair value- FGN Bonds	9(a)	1,249,565	7,875,852
Cash and cash equivalents	8	27,080,192	30,828,729
Receivables and other assets	12	19,778,922	1,437,850
Total		538,002,915	433,999,633

#### Movements in the allowance for impairment of financial assets

The movement in the allowance for impairment in respect of financial assets during the year was as follows:

In thousands of Naira

	Balance at 31 December 2023	Remeasurement of loss allowance	Balance at 31 December 2024
Impairment of Treasury bills	1,173	(1,173)	-
Impairment of State Bonds	27,533	(1,937)	25,597
Impairment of FGN bond	272,775	(7,671)	265,105
Impairment of Eurobond	1,788,535	1,647,774	3,436,309
Impairment of Corporate bond	34,900	7,690	42,590
Impairment of cash and cash equivalents	150,647	106,462	257,109
Impairment of Receivables and other assets	365,031	(335,494)	29,537
Impairment Charge	2,640,594	1,415,651	4,056,246

In thousands of Naira			
	Balance at 31	Remeasurement of loss	Balance at 31
	December 2022	allowance	December 2023
Impairment of Treasury bills	<u> </u>	1,173	1,173
Impairment of State Bonds	10,268	17,265	27,533
Impairment of FGN bond	165,809	106,966	272,775
Impairment of Eurobond	786,967	1,001,568	1,788,535
Impairment of Corporate bond	28,302	6,598	34,900
Impairment of cash and cash equivalents	241,086	(90,439)	150,647
Impairment of Receivables and other assets	115,716	249,315	365,031
Impairment Charge	1,348,148	1,292,446	2,640,594

#### Investments in debt securities

The Fund has invested in some government and corporate debt securities with the following credit quality. The ratings are based on GCR and S&P

	2024	2024		
	Amortised cost	FVTPL	Amortised cost	FVTPL
FGN bonds				
Rated BBB+ and below	260,297,106	-	272,788,633	-
Euro bonds				
Rated BBB+ and below	216,583,818	-	113,222,034	-
State Government bonds				
Rated AA- to AA+	2,617,616	-	2,794,249	-
Rated A- to A+	4,595,110	-	3,307,189	-
Treasury bills				
Rated AA- to AA+	5,800,583	-	1,745,095	-
Supranational bonds				
Rated BBB+ and below	-	-	-	-
Total carrying amount	489,894,235	-	393,857,202	-

#### Cash and cash equivalents

The cash and cash equivalents are held with bank and financial institution counterparties, which are rated B, based on Standard and Poor's (S&P Global) ratings.

#### Amounts arising from ECL

Impairment on some of the debt securities have been measured on a 12-month expected loss on the basis of their low credit risk, whilst the remaining debt securities and receivables have been measured on a lifetime expected loss on the basis of significant increase in their credit risk.

The Fund monitors changes in credit risk on these exposures by tracking published external credit ratings of the counterparties.

12-month and lifetime probabilities of default are based on historical data supplied by Standard and Poor's (S&P Global) for each credit rating. However, if the asset were credit-impaired, then the estimate of loss would be based on a specific assessment of expected cash shortfalls and on the original effective interest rate.

#### (ii) Liquidity Risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or other financial asset. The Fund's approach to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due.

The maturity profiles of the contractual cash flows of financial liabilities and the matching financial assets at 31 December 2024 were as follows:

				Contractual cashf	low	
In thousands of Naira	Carrying amount	Total	2 month or less	2 - 12 months	1 - 2 years	2 - 5 years
Financial Liabilities						
Other payable (Note 14)	23,369,441	23,369,441	22,801,000	568,441	-	-

Total	1,437,850	1,437,850	99,897	1,337,953	-	_

#### **Asset Liability Matching**

The Fund is fully funded through regular contributions from the sponsor, TotalEnergies EP Nigeria Limited who ensures no reliance on borrowings. Although, the Fund is obliged to make payments on retirement benefits once notified, its maturing obligations are usually matched against its financial assets held at amortized cost, cash and other short term investments. The Fund manages its payments on retirement benefits on a behavioural basis and the table below provide an analysis on a behaviour basis.

	Carrying	Contractual					Above 15
31-Dec-24	amount	cashflow	0-12 months	1-5 years	6-10 years	11-15 years	years
In thousands of Naira						#

The Fund has adequate investments in treasury bills and cash and cash equivalents to settle any retirement benefits obligations that could fall due in the next twelve months.

#### (iii) Market risk

Market risk is the risk that changes in market prices, such as interest rates, equity prices and foreign exchange rates will affect the Fund's income or the fair value of its holding of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

#### Management of the market risk

The Fund's strategy for the management of market risk is driven by the Fund's investment objective. The Fund's investment objectives, policies and processes are aimed at instituting a model that objectively identifies, measures and manages market risks in the Fund. The Fund's market position are monitored on a periodic basis by the Fund Manager.

#### (iii)(a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund has no financial instruments linked to variable interests. The risk that the Fund will realise a loss as a result of a change in the fair value of financial assets or liabilities is thus immaterial. The Fund has not entered into any derivative financial instrument to manage this risk.

#### Sensitivity of projected net interest income

Scenario level	0.25%	0.50%	1%	2%	3%
In thousands of Naira					
31 December 2024					
Increase	1,236,665	2,473,330	4,946,660	9,893,321	14,839,981
Decrease	(1,236,665)	(2,473,330)	(4,946,660)	(9,893,321)	(14,839,981)
31 December 2023					
Increase	1,012,878	2,025,756	4,051,512	8,103,023	12,154,535
Decrease	(1,012,878)	(2,025,756)	(4,051,512)	(8,103,023)	(12,154,535)

#### Exposure to Interest Rate Risk

The table below summarises the Funds's exposure to interest rate risk:

31 December 2024	Carrying Amount	Less than 3 Months	3 to 6 Months	6 to 12 Months	1 to 5 years	More than 5years
in thousands of Naira	·					
Financial Assets

State govt Bonds	2,617,616	-	-	_	2,617,616	-
Corporate Bonds	4,637,700	-	-	-	4,637,700	-
Treasury bills	5,800,583	-	-	5,800,583	-	-
Total Interest bearing assets	520,718,430	27,080,192	-	6,092,432	60,646,891	426,898,915
31 December 2023	Carrying Amount	Less than 3 Months	3 to 6 Months	6 to 12 Months	1 to 5 years	More than 5 years
in thousands of Naira						
Financial Assets						
Cash and cash equivalents	30,828,730	30,828,730	-	-	-	-
Financial Assets at amortised cost						
FGN bond and eurobond	386,010,668	-	-	292,322	50,018,547	335,699,799
State govt Bonds	2,794,249	-	-	-	2,794,249	-
Corporate Bonds	3,307,189	-	-	-	3,307,189	-
Treasury bills	1,745,095	-	1,745,095	-	- 1	# -
Commercial paper		=		=	- 1	#
Total Interest bearing assets	424,685,931	30,828,730	1,745,095	292,322	56,119,985	335,699,799

#### Exposure to currency risk

The table below summarises the Funds's exposure to interest rate risk:

#### (iii)(b) Foreign exchange risk

The Fund is exposed to currency risk on purchase of investments denominated in a currency other than its functional currency, the Nigerian Naira. The currencies in which these transactions primarily are denominated are US Dollar. The currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to the changes in foreign exchange rates.

#### Exposure to currency risk

The summary quantitative data about the Fund's exposure to currency risk as reported to the management of the Fund is as follows:

In thousands of US	2024	2023
Investments in private equity	46,953	2,836
Investment in Euro Bonds	143,033	124,816
Investment in Corporate Bonds	2,056	2,058
Cash and cash equivalent	11,123	335
Net statement of net assets exposure	203,165	130,045

Average rate		Year end	spot rate
2024	2023	2024	2023
<u>N</u>	N	N	N
1538.25	907.11	1,538.25	907.11

#### Sensitivity analysis

A reasonably possible strengthening (weakening) of the Naira, as indicated below against the US dollar at 31 December would have affected the measurement of financial instruments denominated in a foreign currency and affected statement of changes in net assets by the amounts shown below. The analysis assumes that all other variables, in particular interest rates, remain constant.

#### Statement of changes in net assets

Strengthening	Weakening
20,316	(20,316)
13,005	(13,005)
	20,316

#### (c) Market price risk

Market price risk is the risk that the fair value of the financial instruments will fluctuate as a result of changes in market prices (other than arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or factors affecting all instruments traded in the market.

The summary quantitative data about the Fund's exposure to market risk as reported to the management of the Fund is as follows;

Net statement of net assets exposure		102,620,413	34,984,447
Financial assets at fair value	9(a)	102,620,413	34,984,447
In thousand of Naira	Note	<u>2024</u>	<u>2023</u>

The information below shows the impact on the Fund's profit for the year, if market prices of held at fair value securities (investment in quoted equities) should increase or decrease by 100 basis points.

In thousand of Naira	2024	2023
Effect of 100 basis points increase on changes in net assets	1,026,204	349,844
Effect of 100 basis points decrease on changes in net assets	(1,026,204)	(349,844)

#### Exposure to equity investment risk

This risks arises from equity price changes of listed and unlisted equities in which the Fund holds investments. At 31 December 2024, the Fund was exposed to equity investment risk as a result of its exposures which stood at N23,783 million (31 December 2023: N19,155 million) in trading equities.

#### Capital management

The Fund has no equity and is sponsored by contributions from the parent company TEPNG as well as surpluses from its investments.

The Fund's objectives are to ensure a stable base to ensure payment of benefits to retirees when due, and to manage liquidity risk arising from these payments.

The Fund is not subject to any externally imposed capital requirements.

#### 7 Use of estimates and judgments

#### (a) Determination of fair values

The fair values of financial assets and financial liabilities that are traded in active markets are based on prices obtained directly from an exchange on which the instruments are traded or obtained from a broker that provides an unadjusted quoted price from an active market for identical instruments. For all other financial instruments, the Fund determines fair values using other valuation techniques.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective and requires varying degrees of judgment depending on liquidity, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The Fund measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- -Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments
- Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are not considered active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

- Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

#### (b) Valuation approach for specific instruments

#### (i) Investments in debt securities

The fair value of debt securities is determined by reference to their quoted closing bid price at the reporting date. The fair value of investments in debt securities held at amortised cost is determined for disclosure purpose only.

#### (ii) Listed equity securities

Listed equity securities are valued using quoted prices in an active market for an identical instrument (Level 1 measurement).

# (c) Accounting classification and fair value

The following table shows the carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value. Financial assets whose fair value equals carrying values as at the reporting date include equities (quoted & unquoted), private equity & mutual funds as well as infrastructure funds.

31 December 2024			Carryin	g amount		Fair value			
In thousands of Naira	Note	Fair value through changes in net assets	Held at Amortized cost	Other financial liabilities	Total	Level 1	Level 2	Level 3	Total

Fair value changes (See note (21))	3,531,929	848,876
Balance as at end of period	22,540,043	19,446,407

# (v) Measurement of fair values of investment properties

i.Fair value hierarchy

The fair value of investment property was determined by external, independent property valuers, having appropriate recognised professional qualifications and recent experience in the location and category of the property being valued. The independent valuers provide the fair value of the Fund's investment property portfolio annually.

The fair value measurement for all of the investment properties has been categorised as a Level 3 (2022: Level 3) fair value based on the inputs to the valuation technique used (see Note 2(d)).

ii. Valuation technique and significant unobservable inputs

The following table shows the valuation technique used in measuring the fair value of investment property, as well as the significant unobservable inputs used.

Valuation technique and significant unobservable inputs

Discounted cash flows: The valuation model considers the present value of net cash flows to be generated from the property, taking into account the expected rental income and its growth rate, rental leakages and facility running costs. The expected net cash flows are discounted using risk adjusted discount rates. Among other factors, the discount rate estimation considers the quality of a building and its location (prime vs secondary) and lease terms.

Significant unobservable inputs

- \_Expected annual rental income growth of 5%
- \_Capitalisation rate of 9% to 9.5%
- \_ Risk-adjusted discount rates of 10.5%
- \_ Rental income leakages of 5%
- \_ Facility running cost of 10%

Inter-relationship between key unobservable

The estimated fair value would increase (decrease) if:

- \_ expected market rental income growth were higher (lower);
- \_ the capitalisation rates were higher (lower);
- \_the risk-adjusted discount rate were lower (higher);
- \_facility running costs were lower (higher).

# 11 Investment properties under development

Investment properties under development comprise:

Investment properties - Office comprise:		
In thousands of Nigerian Naira	2024	2023
Plot 1702 A&B Adetokunbo Ademola Street, Victoria Island, Lagos	-	2,851,572

Information about the Fund's exposure to liquidity risks are disclosed in note 6(b)(ii).

#### 15 Deferred rental income

Deferred income represents mainly rental income received in advance in respect of the Pension Fund's investment in investment properties.

The movement on this account during the year was as follows:

In thousands of Nigerian Naira	2024	2023
Balance, beginning of year		796,782
Additions during the year	6,701,269	1,819,188
Amortization for the year	(4,487,818)	(2,615,970)
Balance, end of year	2,213,451	-
16 Withholding tax/VAT payable		
In thousands of Nigerian Naira	2024	2023
Accounts payable: WHT due - FIRS	31,921	5,540
Accounts payable: VAT due - FIRS	20,770	7,536
Accounts payable: WHT due - SIRB (Rivers/Lagos)	500	710
	53,191	13,786

The Fund is exempted from paying income taxes under the current system of taxation in Nigeria. Dividend and interest income received by the Fund is exempted from withholding tax imposed under the PRA 2014. Withholding tax is deducted from qualifying transactions with suppliers and vendors. During the year, the withholding tax rate was 5% and 10% depending on the transaction type (2023:5% & 10%). No VAT was charged on rent collected from tenants on commercial properties.

The movement on this account during the year was as follows:

In thousands of Nigerian Naira	2024	2023
Opening balance	13,786	2,965
Additional VAT liability	61,043	42,151

#### 27 Related Parties

#### (a) TotalEnergies EP Nigeria Limited

This affiliated entity is the "Sponsor" of the Fund, and provides funding for pension liabilities to the Fund. The outstanding amount due from the Company and its Venture Partners as at the year end was \$2.61 billion (2023: NIL).

Also, two of the investment properties of the Fund are currently leased to the Sponsor for which an amount of \\$3.7 billion (2023: \\$2.1 billion) was earned in the current year as rental income and included as part of investment income in the statement of changes in net assets available for benefits.

#### (b) TotalEnergies EP Nigeria CPFA Limited

This affiliated entity is the Pension Fund Administrator, and the sole Trustee to the Fund in accordance with the Trust Deed. The company provides services to the Fund at cost. During the year, the Fund earned a total of \$\frac{14793}{2}\$ million (2023: \$\frac{14232}{2}\$ million) from the company in respect of rent on one of its properties currently occupied by the company.

#### 28 Events after the reporting date

The Company completed the disposal of its building located at 35, Kofo Abayomi Street, Victoria Island, Lagos after obtaining approvals from all necessary regulatory bodies after the reporting date. The impact of the transaction will be recognized in the financial statements for the year ending 31 December 2025.

Aside the above, there were no events after the reporting date requiring disclosure in, or adjustment to, the financial statements of the Fund (2023: NIL).

#### 29 Contingent assets and liabilities

There are no contingent assets or liabilities as at reporting date (2023: NIL).

#### 30 Actuarial Valuation

Alexander Forbes Consulting Actuaries Nigeria Ltd carried out the actuarial valuation of the Pension Fund at 31 December 2024.

Based on the terms of the Trust Deed, and in line with the provisions of the Pension Reform Act 2014, a valuation is due every year, with the next falling due on 31 December 2025.

#### 31 Actuarial Present Value of Accumulated Pension Fund Benefits and Net Assets

The actuarial present value of accumulated Pension Fund benefits represents the present value of the expected payments by the Pension Fund to existing and past employees, attributable to the service already rendered.

Accumulated Pension Fund benefits are those future periodic payments, including lump sum distributions, which are attributable under the Pension scheme's provisions to the service employees have rendered. Accumulated Pension Fund benefits include benefits payable to:

- i Retired employees or their beneficiaries; and
- ii Beneficiaries of employees who have died

Benefits payable are included, to the extent that they are deemed attributable to employee service rendered to the valuation date.

The actuarial present value of the accumulated Pension Fund benefits is determined by Alexander Forbes, consultants and actuaries (FRC/2017/NAS/00000016625), and is that amount that results from applying actuarial assumptions to adjust the accumulated pension benefits to reflect the time value of money (through discounts for interests) and the probability of payment (by means of decrements such as for death, disability, withdrawal or retirement) between the valuation date and the expected date of payment. The last actuarial valuation of the Fund was made as at 31 December 2024 and the significant actuarial assumptions used in the valuations were as follows:-

#### **Actuarial assumptions:**

Mortality rates for members in service were based on the A67/70 Ultimate Tables, published jointly by the Institute and Faculty of Actuaries, UK while the PA(90) Table, similarly jointly published, was used for members in Pension

Withdrawal from Service:-The following percentages of staff were assumed to withdraw from service

	2024	2023
Less than 45 years of age	0.50%	0.00%
Financial assumptions:	2024	2023
Per annum		
Long term discount rate (about 15 years plus)	17.7%	15.6%
Long term average inflation	14%	14%
Avearge rate of increase in salaries and allowances	14%	14%
Rate of increase to pensions in payment	6%	6%

The valuation established the Scheme's accumulated pension benefit obligations at N469.21 billion (2023: N322.19 billion). (on a liquidation or vested benefit basis) and N526.48-billion (2023: N369.75 billion), (on a going-concern or projected benefit basis).

The foregoing actuarial assumptions are based on the presumption that the Pension Fund will continue as a going concern into the forseeable future. Were the Pension Fund to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

Actuarial present value of the benefits on a liquidation basis - i.e, based on service rendered to date and present pay levels, as at 31 December comprise:

In thousands of Nigerian Naira	2024	2023
Pension Benefits, Members in Pension	132,455,906	222,471,751
Pension Benefits, Members in Service-Vested	336,751,128	99,714,875
	469,207,034	322,186,626

The corresponding valuation of the benefits under the Scheme as at the same date on a going concern basis, that is, based on service rendered to that date and factoring in the impact of projected salary increases amounted to the following:

	2024	2023
In thousands of Nigerian Naira		
Pension Benefits, Members in Pension	132,455,906	222,471,751
Pension Benefits, Members in Service-Vested	336,751,128	99,714,875
Pension Benefits, Members in Service-Non-Vested	57,276,731	47,563,760
	526,483,765	369,750,386

#### 31 Actuarial Present Value of Accumulated Pension Fund Benefits and Net Assets - Continued

#### Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below: Although this analysis does not take into account the full distribution of cash flows expected under the plans, it does provide an approximation of the sensitivity of the assumptions shown.

	31 December 2024		31 December 2023

Discount rate (1% movement)	578,926,541	473,667,170	333,892,510	411,839,289
Future salary growth (1% movement)	433,430,645	354,625,073	394,510,025	347,389,356
Future pension growth (1% movement)	145,701,497	119,210,315	388,534,584	352,914,373
Retirement age increase (1 year movement)	112,711,500	92,218,500	363,998,272	375,301,376
(iii) Plan assets				
Plan assets comprise the following: In Thousands of Nigerian Naira			2024	2023
Equity securities:				
- Consumer markets			583,211	616,181
- Financial institutions			12,550,218	10,702,118
- Telecommunications			3,878,394	5,672,112
- Real estate			2,532,477	1,594,078
Funds			72,472,422	2,729,390
Government backed instruments			493,266,745	398,425,864
Investment properties			22,540,043	22,297,979
Receivables and other assets			19,778,922	1,437,850
Cash and cash equivalents			27,080,192	30,828,729
Others			9,731,115	8,549,923
			664,413,739	482,854,225

All equity securities and government bonds have quoted prices in active markets. All government bonds are issued by the Nigerian federal and state governments and are rated AA+ to BBB+, based on GCR and S&P ratings. The plan assets presented above do not include Prepayments as they are not available to be used in the settlement of the obligations of the Fund.

At each reporting date, an asset-liability matching (ALM) study is performed and the consequences of the strategic investment policies are analysed. The strategic investment policy of the pension fund can be summarised as follows:

- a strategic asset mix comprising 0-5% equity securities, 40-60% government bonds and 20-30% other investments;
- interest rate risk is managed through the use of debt instruments (government bonds)

# **Five-year Financial Summary**

In thousands of Nigerian Naira	2024	2023	2022	2021	2020
Assets:
